Summary

Computer Engineering undergraduate graduating in 2027 (CGPA **9.29/10**) with hands-on experience building full-stack, backend, and AI-powered applications. Proficient in **Java, Python, React, Node.js, FastAPI, PostgreSQL**, and **REST APIs**, with experience in microservices, authentication, role-based access control, and AI/ML integration. Strong foundation in **Data Structures, OOP, and problem solving**, demonstrated by a **Global Rank 2143 in TCS CodeVita**.

Professional Experience

Freelance – AI & Full Stack Developer

Freelance

- Designed, built, and deployed a production web application for a client company, now used by its real end users.
- Delivered AI-powered applications for an individual client, handling environment setup, deployment, and ongoing maintenance (e.g., *CoralAI, VisionKirana*).

Talent Battle Pvt. Ltd. – Java & DSA Intern

Jul 2025

- Engineered and benchmarked 20+ core data structure algorithms in Java (Trees, Graphs, DP).
- Built 5+ modular, reusable Java components adhering to OOP and SOLID principles, cutting redundant utility code by 20%.

Technical Skills

Languages: Java, Python, C++, JavaScript, TypeScript, SQL

Backend: Node.js, FastAPI, REST APIs, Microservices, JWT/OAuth2, RBAC, SQLAlchemy

Frontend: React, Next.js, Tailwind CSS, Vite, HTML5, CSS3, Progressive Web Apps (PWA)

Databases & Cloud: PostgreSQL, MySQL, Firebase, Supabase, Neon, Cloudinary, AWS (EC2/S3), Vercel, Render

AI/ML & Data: PyTorch, ONNX Runtime, YOLOv8, OpenCV, EasyOCR, NumPy, pandas, Power BI

Tools & DevOps: Git, GitHub, Maven, Docker, GitHub Actions, Agile/Scrum

Projects

LoanIQ – AI-Powered Loan Origination System

React, Node.js, FastAPI, Firebase, OCR, NLP | [🔗](#)

- Built an AI-driven loan platform with automated underwriting, explainable credit scoring, role-based access control, and Razorpay payment integration.
- Integrated PAN OCR, biometric liveness detection, and NLP-based credit risk analysis; achieved reported reductions of **45% in fraudulent submissions** and **60% in manual verification time**.

Antariksh OS – Edge AI Earth Observation & Disaster Response

Next.js, FastAPI, PyTorch, ONNX | [🔗](#)

- Developed an offline-first platform integrating three FastAPI microservices for cloud removal, crop-stress analysis, and evacuation routing, with quantized ONNX inference.
- Implemented radar-guided image processing using FFT, vegetation/flood-risk mapping, and A* routing to generate evacuation paths around flooded zones.

CoralAI – Coral Reef Health Mapping & Analytics

React, FastAPI, PyTorch, YOLOv8, Firebase | [🔗](#)

- Built a deep-learning platform for coral detection, segmentation, and reef-health assessment from underwater imagery using YOLOv8 and U-Net.
- Developed a FastAPI backend with Leaflet GIS visualization, Firebase authentication and access control, and automated PDF reporting; reported **91%+ mAP** for model evaluation.

Education

JSPM's Bhivarabai Sawant Institute of Technology & Research | B.E. Computer Engineering

2023 - Present

CGPA: **9.29/10 (TY)**, 9.31/10 (SY), 10.0/10 (FY)

Pune, India

Jogeshwari Mata Junior College | HSC (Science) – **65.50%** | MHT-CET: **92.90%ile**

2023

Janata Vidyalaya, Pimpri Sandas | SSC (State Board) – **84.81%**

2021

Hackathons & Competitions

- TenZorX AI Hackathon:** Designed *LoanIQ*'s architecture with OCR identity extraction and NLP analytics, cutting appraisal cycle by 50%.
- Razorpay Buildathon:** Built *LoanIQ* as a secure AI lending platform with biometric liveness, PAN OCR, explainable AI credit scoring, and direct Razorpay API integration.

Accomplishments

- Global Rank 2143 in TCS CodeVita** – International Coding Contest by Tata Consultancy Services (TCS), outperforming 100K+ participants.
- Earned **100 Days LeetCode Consistency Certificate** across core DSA, and qualified competitive rounds in **MaTPO Aptitude Idol 2025**.
